Use Cases: VR by OneBonsai

1. **Securitas [VR Fire Training]** - [YouTube Video](#)

OneBonsai developed a VR fire training that Securitas can deploy anywhere using the VR flight cases. Instead of sending out huge fire trucks, they use VR as a safe and efficient alternative.

2. **Belgian Navy [VR Fire Training PRO]** - [YouTube Video](#)

To train ship fires, the belgian Navy uses OneBonsai VR Flightcases and OneBonsai VR Fire training software with custom built Mixed Reality Hardware.

3. **Belgium Police [VRTS]** - [YouTube Video](#)

VRTS: VR software developed by OneBonsai for training police forces that runs on the flight cases.
